ALUMINIUM ROOF DRAINAGE

PREFA'S COMPLETE SYSTEM

70
YEARS
QUALITY

since 1946

VISUAL APPEARANCE

Gutters can make an impact on a building's appearance in one of two ways: either they help to present the building in the best possible light by blending harmoniously into the overall appearance and becoming virtually invisible, or they use all the power of colour to deliberately create highlights and emphasize the building's architecture. Whichever version you prefer, PREFA's complete aluminium drainage system opens up a whole world of colour.

DIMENSIONS

250 mm	round gutters, box gutters
280 mm	round gutters
333 mm	round gutters, box gutters
400 mm	round gutters, box gutters
500 mm	box gutters
700 × 1.0 mm	on-roof gutters

DURABLE SPECIAL COATING — PERFECT PROCESSING

The PREFA gutter is characterised by its high-quality surface treatment in a coil-coating procedure which renders the coating layer malleable and weather resistant, even in extreme conditions.

GUARANTEED NON-CORROSIVE — LOW MAINTENANCE

All parts of the PREFA gutter system are made of aluminium, a non-corrosive material, which, thanks to the innovative surface treatment in a coil-coating procedure, is ideal for the creative and functional requirements of your building's exterior architecture. Even unpleasant maintenance work such as repainting is not an issue with PREFA.

ALUMINIUM — ENVIRONMENTALLY-FRIENDLY

The PREFA aluminium drainage system is the best choice from an ecological point of view too. Unlike conventional materials, aluminium does not release harmful heavy metals into the sewage water when gutters and pipes are constantly flushed out with rainwater. Aluminium is 100% recyclable too!

PREFA SQUARE DOWNPIPE SQUARE, PRACTICAL, ATTRACTIVE!

THE INNOVATIVE DRAINAGE SYSTEM FOR MODERN ARCHITECTURE

The square, aluminium complete system sets new standards for drainage. Thanks to its minimalist and elegant design, it is ideal for use on modern structures. The PREFA drainage system is made of up various coordinated components such as square downpipes with radii corresponding to the box gutters, various downpipe elbows with a 72° bend, outlet connectors or a leader head with a square outlet.

The innovative aluminium products are outstanding due to their robust design. Take, for example, the square downpipe with a side length of 100 mm, made of 1.6-mm thick extruded profiles and equipped with a continuous fixing rail for fasteners.

In addition to the innovative design, the concealed fastening system (consisting of a fastener with an M10 thread) particularly emphasises the minimalist appearance of the downpipe on the façade.

The perfectly matching range of accessories facilitates quick and easy mounting on the building. PREFA's complete system is available in ten standard colours as well as in uncoated aluminium. For individual colour requests, special coatings in RAL or NCS colours are also possible.

PREFA'S UNIQUE COMPLETE SYSTEM

PREFA's intelligent, complete gutter system offers you a full range of aluminium gutters including mounting accessories from one supplier – and in the colour of your choice! In this way, all the components will blend harmoniously into the overall appearance of your building.

THE PREFA COLOUR RANGE FOR GUTTER SYSTEMS

1 gutter 250, 280
half round

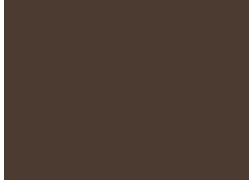

2 gutter 333
half round

3 gutter 400
half round

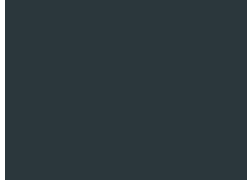

4 box gutter 250, 400¹⁾,
500****

5 box gutter 333¹⁾

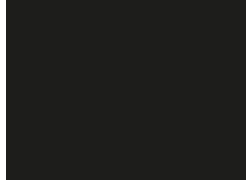

6 on-roof gutter
700 × 1.0 mm

01 brown (own colour)

02 anthracite (similar to RAL 7016)

03 black (similar to RAL 9005)

04 brick red (similar to RAL 8004)

05 oxide red (similar to RAL 3009)

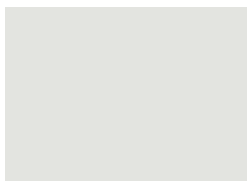

06 moss green (similar to RAL 6005)

07 light grey (similar to RAL 7005)

08 zinc grey (own colour)

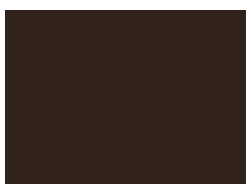

10 prefa white (similar to RAL 9002)

A WHOLE RANGE OF COLOURS IF REQUIRED

As PREFA's drainage system is available in a range of classic standard colours, solutions which harmoniously match all common roof and façade colours can generally be found. However, if you find that the colour match is not perfect enough, you can order your drainage system from PREFA in the colour of your choice. All parts are made of powder-coated aluminium, resulting in a unique complete system.

11 nut brown (own colour)

12 metallic silver***

13 plain aluminium*/**

* The recreated natural colouring of the plain aluminium colour varies widely in shade, giving the product its distinctive character.

** Surface appearance alterations caused by processing are not covered by the guarantee. Follow the instructions.

*** Colour differences may occur when coating metal-effect colours.

**** The following colours are powder-coated: 04 brick red, 05 oxide red, 06 moss green, 08 zinc grey, 10 prefa white, 11 nut brown and 12 metallic silver. Please allow for longer delivery times.

1) The PREFA square downpipe is kept in stock in the powder-coated colours 01 brown, 02 anthracite and 07 light grey, but can be supplied in all RAL colours. Please allow for longer delivery times and a surcharge.
